DETAILED ACTION

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1. 3 and 4 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 7-10 of copending Application No.

11/138,401. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the invention teach a method of mixing first granule with second granules, the second granules having a thermoplastic content, heating the granular mix within a frame to allow the second granules to expand and melt at

the surfaces to bond with the first granules however, in the '401 application, applicant does not recite a cooling step. It would have been obvious to one having ordinary skill in the art to provide the cooling step because the claims are drafted with comprising language and to eliminate a step and function would have been obvious and the framed structure would have to be cooled in order to be used.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

- 3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Charpentier teaches a method of agglomerating pellets or expanded polystyrene into a shaped structure by heating the pellets to a softening temperature and compressing the heat pellets into a desired shape and form and thereafter cooling.
